

1. Record Nr.	UNINA9910824520103321
Autore	Arshad Hassan
Titolo	Complications in Otolaryngology—Head and Neck Surgery // by: Bernal-Sprekelsen, Manuel, Carrau, Ricardo L., Dazert, Stefan, Dornhofer, John L., Peretti, Giorgio, Tewfik, Marc A., Wormald, Peter-John
Pubbl/distr/stampa	Stuttgart ; ; New York : , : Thieme, , [2013] ©2013
ISBN	3-13-258024-4 3-13-173281-4
Edizione	[1st ed.]
Descrizione fisica	1 online resource (354 p.)
Disciplina	617.5/1
Soggetti	Head - Surgery Neck - Surgery Surgery - Complications
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Complications in Otolaryngology-Head and Neck Surgery -- Dedication -- Title Page -- Copyright -- Editors -- Contributors -- Foreword I -- Foreword II -- Preface -- Table of Contents -- Section I Otology and Lateral Skull Base -- 1 Outer Ear and External Auditory Canal -- Otoplasty and Surgery of the External Ear -- Introduction -- Overview of Techniques for the Correction of Protruding Ears -- Complications -- Surgery of the External Auditory Canal -- General Surgical Guidelines -- Complications in Disorders of the External Auditory Canal -- References -- 2 Tympanic Membrane Reconstruction: Difficult Situations and Complications -- Anatomy -- Etiology and Classification of Tympanic Membrane Perforations -- Aim of Surgery -- Surgical Approaches for Tympanic Membrane Reconstruction -- Graft Materials -- Intraoperative Complications -- Bleeding -- Damage to the Tympanomeatal Flap -- Enlargement of the Bony Ear Canal -- Damaging the Temporomandibular Joint -- Elevating the Tympanic Anulus and Entering the Middle Ear -- Injury to the Chorda Tympani Nerve -- Sensorineural Hearing Loss -- Facial Nerve Injury -- De-

epithelialization of the Perforation Edge -- Graft Placement --
Repositioning the Flaps -- Meatoplasty -- Postoperative Complications
-- Wound Infection -- Bleeding -- Iatrogenic Cholesteatoma --
Tympanic Membrane Retraction -- Facial Nerve Paralysis --
Lateralization of the Tympanic Membrane -- Blunting in the Anterior
Sulcus -- References -- 3 Management and Prevention of
Complications in Stapes Surgery and Ossicular Chain Reconstruction --
Introduction -- Stapes Surgery -- Intraoperative Challenges and
Complications -- Immediate Postoperative Complications -- Long-term
Postoperative Complications -- Ossicular Chain Reconstruction --
Intraoperative Challenges and Complications -- Immediate
Postoperative Complications.
Long-term Postoperative Complications -- References -- 4
Complications of Mastoidectomy -- Preoperative Considerations --
Intraoperative Complications -- Facial Nerve Injury -- Sigmoid Sinus
Injury -- Labyrinthine Injury -- Acoustic Trauma -- Dura Mater
Exposure and Injury -- Miscellaneous Intraoperative Complications --
Postoperative Complications -- Unfavorably Displaced Pinna --
Infection -- The Unstable Open Mastoid Cavity -- Vertigo -- Mastoid-
Cutaneous or Mastoid-Canal Fistula -- Cerebrospinal Fluid Leak and
Meningoencephalocele -- Conclusions -- References -- 5
Complications in Cochlear Implants and Implantable Hearing Devices --
Introduction -- Complications in Cochlear Implants -- Nerve Injury
Secondary to Cochlear Implantation -- Infectious Complications of
Cochlear Implantation -- Device-Related Complications of Cochlear
Implantation -- Other Complications and Challenges of Cochlear
Implantation -- Bony Complications of Osseointegrated Implants --
Soft Tissue Complications of Osseointegrated Implants -- Conclusions
-- References -- 6 Complications in Surgery of the Lateral Skull Base
-- Introduction -- Preoperative Counseling -- Associated Sequelae and
Complications of Skull Base Surgery -- Imaging -- Positioning of the
Patient on the Operating Table -- Lateral Supine Position -- Sitting
Position ("Beach Chair Position") -- Potential Anesthetic Complications
-- Intraoperative Surgical Complications -- Morbidity -- Cranial Nerve
Deficits -- Facial Nerve Injury -- Trigeminal Nerve Damage --
Cerebellar and Brainstem Injury -- Hemorrhage -- Injury to Arteries --
Vasospasm -- The Anterior Inferior Cerebellar Artery -- Veins --
Postoperative Complications -- Other Forms of Postoperative
Intracranial Bleeding -- Hydrocephalus -- Central Nervous System --
Mortality -- Completeness of Resection -- Cerebrospinal Fluid
Leakage.
Postoperative Infection -- Postoperative Headache -- Revision Lateral
Skull Base Surgery -- Conclusions -- References -- Section II Rhinology
and Anterior Skull Base -- 7 Complications Following Surgery of the
Septum and Turbinates -- Septoplasty -- Indications -- Preoperative
Planning -- Anesthesia -- Obstacles and Complications -- Inferior
Turbinate Reduction Procedures -- Complications after Inferior
Turbinate Reduction -- Summary -- References -- 8 Complications
Following Surgery of the Nasolacrimal System -- Introduction --
Anatomy -- Complications Defined by Each Surgical Step --
Preoperative Planning -- Nasal Preparation -- Raising the Mucosal
Flaps-Intraoperative Strategies -- Creating a Rhinostomy -- Bleeding
-- Exposing the Sac -- Opening the Sac -- Intubating the Canalicular
System -- Immediate Postoperative Issues -- Periorbital Emphysema --
Facial Subcutaneous Emphysema and Ecchymosis -- Infection,
Crusting, and Adhesions -- Special Circumstances -- Complications of
Conjunctivodacryocystorhinostomy -- Laser-assisted DCR Surgery --
Lacrimal Sump Syndrome -- Summary -- References -- 9

Complications in Endoscopic Sinus Surgery -- Introduction -- Special Concerns for Each Sinus -- The Maxillary Sinus -- The Frontal Sinus -- The Ethmoid Sinuses -- The Sphenoid Sinus -- Vascular Complications -- Hemorrhage -- Anterior Ethmoidal Artery Injury -- Sphenopalatine Artery Branch Injury -- Internal Carotid Artery Injury -- Neurologic Complications -- Intracranial Injury/Cerebrospinal Fluid Leak -- Pneumocephalus -- Meningitis/Intracranial Abscess -- Optic Nerve Injury -- Infraorbital Nerve Injury -- Ophthalmic Complications -- Orbital Injury -- Extraocular Muscle Injury -- Orbital Hematoma -- Nasolacrimal Duct Injury -- Intranasal Wound Healing Complications -- Middle Turbinate Lateralization -- Frontal Recess Scarring -- Maxillary Ostial Stenosis.

Mucocele Formation -- Missed Ostium Sequence/Mucus Recirculation -- Other Complications -- Skin Injury -- Subcutaneous Emphysema -- Anosmia/Hyposmia -- Toxic Shock Syndrome -- Myospherulosis -- Conclusion -- References -- 10 Complications in Endoscopic Skull Base Surgery -- Introduction -- Scope of the Problem -- Complication

Avoidance -- Anatomic Corridors in Endoscopic Endonasal Approaches -- Principles of Endoscopic Endonasal Surgery -- Surgical Planning -- Intraoperative Steps -- Intraoperative Complications -- Bleeding and Vascular Injury -- Neurologic Injury -- Postoperative Complications -- Complications Related to Skull Base Reconstruction -- Infectious Complications -- Systemic Complications -- Conclusion -- References

-- 11 External Approaches to the Paranasal Sinuses and Skull Base --

Introduction -- External Approaches to the Maxillary Sinus --

Introduction -- Indications -- Complications: Prevention and

Management -- External Ethmoidectomy -- Indications -- Technique

-- Complications: Prevention and Management -- Packing-Related

Complications -- External Approaches to the Frontal Sinus --

Indications -- Technique -- General Complications -- Osteoplastic Flap

-- External Approaches to the Sphenoid Sinus -- Indications --

Complications -- References -- Section III Complications of Head and

Neck Surgery -- III A Surgery of the Oral Cavity and Oropharynx -- 12

Complications of Adenotonsillectomy -- Introduction -- Post-

tonsillectomy Hemorrhage -- Postoperative Respiratory Distress --

Risk Factors -- Airway Fire -- Perioral Burns -- Cervical Complications

Following Adenotonsillectomy -- Velopharyngeal Insufficiency

Following Adenotonsillectomy -- Nasopharyngeal Stenosis --

References -- 13 Complications of Obstructive Sleep Apnea Surgery --

Introduction -- Palatal Surgery -- Complications in the Perioperative

Period.

Hemorrhage and Wound Dehiscence -- Velopharyngeal Insufficiency --

Nasopharyngeal Stenosis -- Hypogeusia -- Voice Disturbances --

Globus Sensation -- Complications Related to Specific Palate

Procedures -- Transpalatal Advancement Pharyngoplasty -- Expansion

Sphincter Pharyngoplasty -- Anterior Palatoplasty --

Oropharyngeal/Hypopharyngeal Procedures -- Volumetric Reduction

Procedures -- Radiofrequency Ablation of the Tongue Base -- Office-

based Procedures for Nonapneic Snoring -- Pillar Implants -- Injection

Snoreplasty -- Radiofrequency of the Soft Palate -- General Anesthesia

in Patients with OSA -- Preoperative Recommendations --

Intraoperative Management -- Postoperative Management --

References -- 14 Complications in Cleft Lip and Palate Surgery --

Introduction -- Cheilorhinoplasty, Palatoplasty -- Lip Surgery -- Cleft

Surgery -- Gingivoalveoloplasty and Cleft Bone Grafting -- Maxillary

Osteotomy and Maxillary Distraction Osteogenesis --

Velopharyngoplasty -- References -- 15 Pull Through, Visor Flap, and

Transmandibular Surgery -- General Considerations -- Selecting the

Correct Approach: Patient and Tumor Factors -- Risk Factors for Complications -- Mandibulotomy -- Complications after Mandibulotomy: Historical Data -- Incision Design -- Incision Closure -- Osteotomy -- Bone Fixation Technique -- Treatment of Complications -- Pull-Through Procedure -- Lower Cheek and Visor Flaps -- References -- III B Surgery of the Larynx, Trachea, Hypopharynx, and Esophagus -- 16 Intubation Injuries and Airway Management -- Introduction -- Historical Note -- Mechanism of Intubation Injury -- Factors Contributing to Intubation Trauma -- Patient-related Factors -- Procedure-related Factors -- Patient Evaluation -- History -- Laryngeal Examination in Patients with Suspected Intubation Trauma -- Immediate/Acute Complications of Intubation.
Dislocation of the Arytenoid Cartilage.

Sommario/riassunto

"For all specialists and trainees performing otolaryngology-head and neck surgery, knowledge of potential complications is integral to successful procedures. Complications in Otolaryngology fills an important gap in the field by examining complications in all areas related to otolaryngology and head and neck surgery outside of facial plastic and aesthetic surgery. From procedures in the middle and inner ear, paranasal sinuses, and salivary glands, to endoscopic skull base surgery, to airway management, laryngectomy, thyroid surgery, and much more, the book is a practical reference for the busy surgeon. Special Features: The first complete, one-volume source on risks and complications in otology, rhinology, and head and neck surgery, Written by a team of leading worldwide authorities, who share tips, tricks, pearls, and clinical experience in every instructive chapter, Formatted for easy accessibility, including a definition of each complication and its sequelae, incidence of occurrence, point during surgery when it is most likely to happen, tips for avoiding it, and techniques for managing it. Includes current scientific, evidence-based information throughout. Generously illustrated, with more than 400 full-color, intraoperative photographs and endoscopic images to help readers visualize surgical problems and solutions for every case, including revision surgery. For the increasing number of ENT and neurosurgical teams who perform advanced endoscopic surgery of the anterior skull base beyond the paranasal sinuses, this book contains valuable information on complications not available elsewhere. It is essential reading for all surgeons who need to prepare for and manage every contingency for the best possible outcomes in otolaryngology and head and neck surgical procedures"--
