| Sommario/riassunto | "This will be the seventh title in the new series - Differential Diagnoses in Surgical Pathology. Often times after examining a difficult case a pathologist will arrive at a differential diagnosis. However, the majority of reference materials available are arranged in a traditional format where each entity is discussed in its own section with little or no emphasis on differentials. To help in these scenarios this book will be arranged according to the most common differential diagnoses in cytopathology and describe the lesions side by side for easy comparison. Like other volumes in the series the book presents material in a way that pathologists actually work, and is ideal as a quick-reference guide or for deep-dive research. Features side-by-side comparisons of all the core elements of a diagnosis, including location, shape, morphology, prognosis, and treatment.Covers common and rare disorders including conditions of the pulmonary and urinary tracts, as well as the kidney, liver, breast, and pancreas.Sample diagnoses are presented in a succinct bulleted format with accurate, high-quality images for a helpful visual context. Highlights clinical differences between lesions and the latest molecular alterations.Follows the same structural format as the other volumes in the series, which cover the |
