Sommario/riassunto	Language documentation is a rapidly emerging new field in linguistics which is concerned with the methods, tools and theoretical underpinnings for compiling a representative and lasting multipurpose record of a natural language. This volume presents in-depth

introductions to major aspects of language documentation, including overviews on fieldwork ethics and data processing, guidelines for the basic annotation of digitally-stored multimedia corpora and a discussion on how to build and maintain a language archive. It combines theoretical and practical considerations and makes specific suggestions
