Sommario/riassunto

What is China's rightful place on the world stage? Will the world remain unipolar as signs of American decline appear to be mounting? How can China maintain a harmonious relationship with its neighbors? What does China intend to do with the new power and influence that appears to be at its disposal? In light of emergent post-2008 economic realities, how should China adjust its foreign economic relations? This volume, the first of its kind, gathers a collection of translations of influential essays, talks, and papers on Chinese foreign policy, national security, and foreign economic relations written by Chinese elites. Many papers have also served as propositions for policy prescriptions to China's leaders, the vast majority of which have to date only been available in Chinese.
