	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Nota di bibliografia	Includes bibliographical references.
	Sommario/riassunto	The medieval poem Cursor Mundi is a biblical verse account of the history of the world, offering a chronological overview of salvation history from Creation to Doomsday. Originating in northern England around the year 1300, the poem was frequently copied in the north before appearing in a southern version in substantially altered form. Although it is a storehouse of popular medieval biblical lore and a fascinating study in the eclectic use of more than a dozen sources, the poem has until now attracted little scholarly attention. This five-part collaborative edition presents the Arundel version of the poem with variants from three others.

	Sommario/riassunto	Engage your ELL students with digital tools! The Corwin Connected Educators series is your key to unlocking the greatest resource available to all educators: other educators. ELL students deserve a classroom environment full of choice, inquiry, and creativity. By blending technology with teaching, your students can thrive. John Spencer's insights will enable you to . Introduce project-based, differentiated instruction in your ELL classroom . Expand your use of innovative technology . Strengthen your students' English language skills Being a Connected Educator is more than a set of actions: it's a belief in the potential of technology to fuel lifelong learning. To explore other books in the series, visit the Corwin Connected Educators website at https://www.corwin.com/connectededucators/. "John Spencer is the kind of teacher that I wish my own kids had and that all students deserve. This book shows clearly and practically how technology can be

used to give all students greater choice and a more powerful voice. This book inspired me to rethink my own approach and what I'm planning to do in my classroom tomorrow." Philip Cummings, 6th Grade Teacher Presbyterian Day School "Spencer provides a clear framework for teachers to help students improve their language skills. A teacher can pick this book up and be provided with specific ideas and techniques which can be implemented in a classroom immediately." Josh Stumpenhorst, Teacher Lincoln Junior High School Naperville, IL.

| Sommario/riassunto | This book showcases cutting-edge research papers from the 8th International Conference on Research into Design (ICoRD 2021) written by eminent researchers from across the world on design processes, technologies, methods and tools, and their impact on innovation, for supporting design for a connected world. The theme of ICoRD'21 has been "Design for Tomorrow". The world as we know it in our times is increasingly becoming connected. In this interconnected world, design has to address new challenges of merging the cyber and the physical, the smart and the mundane, the technology and the human. As a result, there is an increasing need for strategizing and thinking about design for a better tomorrow. The theme for ICoRD'21 serves as a provocation for the design community to think about rapid changes in the near future to usher in a better tomorrow. The papers in this book explore these themes, and their key focus is design for tomorrow: how are products and their development be addressed for the immediate pressing needs within a connected world? The book will be of interest to researchers, professionals and entrepreneurs working in the areas on industrial design, manufacturing, consumer goods, and industrial management who are interested in the new and emerging methods and tools for design of new products, systems and services. |
