| Sommario/riassunto      | Vietnam's successes in the health sector are legendary. Its rates of infant and under-five mortality are comparable to those of countries with substantially higher per capita incomes. Vietnam continues to be an over-achiever in the health sector according to data assembled in this book. Like other countries, though, Vietnam faces challenges in its health system. By international standards, for example, Vietnam has a high incidence of catastrophic household health spending-a large fraction of households make out-of-pocket payments for health care that exceeds a reasonable fraction of their inco |
