Edizione	[1st ed.]
Descrizione fisica	1 online resource (137 p.)
Classificazione	MED071000
Disciplina	338.4/76151
Soggetti	Pharmaceutical industry - Corrupt practices
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Machine generated contents note: Introduction Part 1. "The 4 Secrets That Drug Companies Don't Want You to Know" Part 2. What Has Happened to R&D Productivity? a. Impact of Mergers b. Impact of FDA c. Impact of Payers Part 3. Challenges in Key Therapeutic Areas for Improving Health a. Cancer b. Diseases of the Brain c. Cardiovascular Disease d. Diabetes e. Bacterial Infections Part 4. Improving R&D Output a. View of Others b. Personal Vision Part 5. Restoring the Pharma Image Part 6. Final Thoughts.
Sommario/riassunto	"While the pharmaceutical industry can play an important role in converting the knowledge generated by the Human Genome Project into new medicines, it also faces a popular perception that it is simply out to make money by promoting unsafe medicines to an unsuspecting public. Written by former Pfizer president John LaMattina, this book addresses the progress that the industry has made in improving its abilities to measure both the risk and benefits of its new medicines, where the industry should invest its R&D resources, and how the industry can rehabilitate its image. Essential reading for pharmaceutical executives and professionals"--
