Growth and Development Capital; The PLC and the BCG Growth Matrix; Development Capital; Target companies; Money in deals; Money out deals; Objectives; Growth Capital</p> <p>Target companies</p>
Sommario/riassunto	<p>Unfairly reviled, and much misunderstood, private equity differs from all other asset classes in various important respects, not least the way in which its fund mechanisms operate, and the way in which its returns are recorded and analysed. Sadly, high level asset allocation decisions are frequently made on the basis of prejudice and misinformation, rather than a proper appreciation of the facts. Guy Fraser-Sampson draws upon more than twenty years of experience of the private equity industry to provide a practical guide to mastering the intricacies of this</p>

highly specialist asset class.
