Sommario/riassunto	Charles Darwin liked and loathed Australia. The father of evolution paid the continent a flying visit during in 1836, and was glad to put the place behind him. Yet Australia's astonishing wildlife influenced him deeply, and his revolutionary theories still resonate profoundly in Australian society. Two hundred years after Darwin's birth, at a time when evolutionary theory is facing challenges from those who believe in intelligent design, award-winning writer and Anglican bishop Tom Frame explores Darwin's life and times, and asks whether it is possible for us to believe in God and Darwin at
