Sommario/riassunto

In the European tradition, parliaments are central political institutions that play a crucial role in the development of democratic societies. No other institution regularly offers a public arena for open deliberation and dissent, for discussing opposite points of view and for reaching compromise solutions between political adversaries. However, in spite of the growing visibility of modern parliaments, the study of parliamentary language use, interaction practices and discourse strategies has long been under-researched. Based on extensive parliamentary data, this book integrates a rich variety of innovative analytical approaches that explore the far-reaching impacts of parliamentary practices and linguistic strategies on current political action and interaction. Individual chapters problematise and re-evaluate the discourse-shaped identities and roles of Members of Parliament, the structure and functions of parliamentary discourse genres, interpersonal behaviour and intertextual meaning co-construction in post-Communist parliaments. They offer broad cross-cultural perspectives on parliamentary discursive psychology and argumentation. The book provides essential reading for scholars and students of language and linguistics, rhetoric, political and social sciences, as well as for anyone interested in language and politics.
