

1. Record Nr.	UNINA9910824903703321
Autore	Nehter Pedro
Titolo	Theoretical analysis of high fuel utilizing solid oxide fuel cells [[electronic resource] /] / Pedro Nehter
Pubbl/distr/stampa	New York, : Nova Science Publishers, c2009
ISBN	1-60741-205-5
Edizione	[1st ed.]
Descrizione fisica	1 online resource (64 p.)
Disciplina	621.31/2429
Soggetti	Solid oxide fuel cells Fuel cells
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. [49]-50) and index.
Nota di contenuto	Intro -- THEORETICAL ANALYSIS OF HIGH FUEL UTILIZING SOLID OXIDE FUEL CELLS -- CONTENTS -- PREFACE -- INTRODUCTION -- ANALYTICAL SOLUTION OF THE CURRENT DISTRIBUTION -- 2.1. POWER DENSITY -- 2.2. REQUIRED CELL AREA -- NUMERICAL SOLUTION OF THE CURRENT DISTRIBUTION -- 3.1. SOFC CONCEPT -- 3.2. ENERGY BALANCE -- 3.3. MASS BALANCE -- 3.4. ELECTROCHEMICAL APPROACHES -- 3.5. ACTIVATION OVERPOTENTIAL -- 3.6. CONCENTRATION OVERPOTENTIAL -- 3.7. OHMIC OVERPOTENTIAL -- 3.8. SOLUTION TECHNIQUE -- 3.9. EXEMPLARY RESULTS -- NICKEL OXIDE FORMATION AT THE ANODE -- HIGH FUEL UTILIZING SOFC -- CONCLUSION -- REFERENCES -- Untitled.
