Sommario/riassunto

This volume will explore the potentially transformative role of effective laws and legal institutions in providing people with more opportunity that is both inclusive and equitable. Laws, legal frameworks and judicial institutions can create opportunity by providing the space to build human capital and assets, create jobs, and encourage individuals and organizations to make productive investments based on a greater sense of stability. They can also promote inclusion by advancing access to jobs and expanding the reach and quality of services including access to justice as well as promote equity by supporting equal opportunities, promoting open and accountable governance, and effective judicial and legal institutions. The objective is to shift focus to laws, legal frameworks and judicial institutions. To this end, submissions will explore the potentially transformative role of effective laws and legal institutions in providing people with more opportunity that is both inclusive and equitable.
