

1. Record Nr.	UNINA9910824945003321
Titolo	Annual review of scalable computing . Volume 6 // editor Yuen Chung Kwong
Pubbl/distr/stampa	Singapore, : Singapore University Press, : World Scientific, c2004
ISBN	1-281-93461-5 9786611934613 981-279-472-7
Edizione	[1st ed.]
Descrizione fisica	1 online resource (134 p.)
Collana	Series on scalable computing ; ; 6
Altri autori (Persone)	YuenC. K
Disciplina	004
Soggetti	High performance computing Parallel processing (Electronic computers)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Contents ; 1 An OMIS-based Approach to Monitoring Distributed Java Applications ; 1.1 Introduction ; 1.2 Related Work ; 1.3 Building of a Monitoring system ; 1.4 A Way from OMIS to J-OMIS ; 1.5 Architecture of Java-Oriented Monitoring System ; 1.6 The J-OCM as Middleware 1.6.1 Interface Definition 1.6.2 Stub and Skeleton ; 1.6.3 Object Manager and Registration/Naming Service ; 1.6.4 Transport Layer ; 1.7 Event Handling in the J-OCM ; 1.7.1 Java-Oriented Techniques for Event-Based Monitoring ; 1.7.2 The OMIS Event Model ; 1.7.3 Event Processing 1.7.4 Event-Based Interaction in Low-Level Components 1.8 Monitoring RMI Calls ; 1.8.1 Existing Techniques of RMI Monitoring ; 1.8.2 An Approach to Monitoring RMI calls ; 1.8.3 Architecture of J-OCM/RMI ; 1.9 Conclusions ; 1.10 Bibliography 2 Scalable and Self - Optimizing Data Grids

2.1 Motivation and Overview		; 2.2 P2P Systems as
Components for Scalable Grids		; 2.3
A Scalable Data Grid with P2P Components		
; 2.4 Availability Component		; 2.4.1 Basic
Equations and Model Parameters		; 2.4.2
Analytical Model		
2.4.3 Applying the Model		2.5 Synchronization
Component		; 2.6 Self-Management Components
; 2.7 Putting it All Together		; 2.8 Related Work
; 2.9 Conclusion		; 2.10 Bibliography
		; 3 The
Immediate Dependency Relation: An Optimal Way to Ensure Causal		
Group Communication		
; 3.1 Introduction		
3.1.1 Background		

Sommario/riassunto

This volume presents original articles, reviewing various aspects of scalable computing. Parallel computation with optically interconnected systems makes its first appearance, and further work on distributed Java is also reported. Optimizing data grids and group communication are studied in two analytical chapters. The comprehensive treatment of these topics adds further to the current literature. <br><i>Contents:

- An OMIS-based Approach to Monitoring Distributed Java Applications
- Scalable and Self-Optimizing Data Grids
- The Immediate Dependency Relation
- Highl
