

1. Record Nr.	UNINA9910825006303321
Titolo	Data management in the semantic web [[electronic resource] /] / Hal Jin, editor
Pubbl/distr/stampa	Hauppauge, N.Y., : Nova Science Publishers, c2012
ISBN	1-61324-760-5
Edizione	[1st ed.]
Descrizione fisica	1 online resource (450 p.)
Collana	Distributed, cluster and grid computing
Altri autori (Persone)	JinHal
Disciplina	025.042/7
Soggetti	Web databases Internet searching Semantic Web
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- DATA MANAGEMENT IN THE SEMANTIC WEB -- DATA MANAGEMENT IN THE SEMANTIC WEB -- CONTENTS -- PREFACE -- Chapter1INTERPRETATIONSOFTHEWEBOFDATA -- Abstract -- 1Introduction -- 2ADistributedKnowledgeBase -- 2.1RDFSschema -- 2.2WebOntologyLanguage -- 2.3Non-AxiomaticLogic -- 2.3.1TheNon-AxiomaticLanguage -- 2.3.2TheNon-AxiomaticReasoner -- 3ADistributedMulti-RelationalNetwork -- 3.1Single-RelationalNetworks -- 3.2Multi-RelationalNetworks -- 3.3Single-RelationalNetworkAlgorithms -- 3.3.1ShortestPath -- 3.3.2Eccentricity, Radius,andDiameter -- 3.3.3ClosenessandBetweennessCentrality -- 3.3.4StationaryProbabilityDistribution -- 3.3.5PageRank -- 3.3.6 SpreadingActivation -- 3.3.7AssortativeMixing -- 3.4PortingSingle-RelationalAlgorithmstotheMulti-RelationalDomain -- 3.4.1AMulti-RelationalPathAlgebra -- 3.4.2Multi-RelationalGrammarWalkers -- 4ADistributedObjectRepository -- 4.1PartialObjectRepository -- 4.2 FullObjectRepository -- 4.3VirtualMachineRepository -- 5Conclusion -- Acknowledgements -- References -- Chapter 2 TOWARD SEMANTICS-AWARE WEB CRAWLING -- ABSTRACT -- 1 Introduction -- 2 Related Work -- 3 Semantics-Aware Crawler -- 3.1 Identifying Topic-Specific URLs -- 3.2 Building Training Examples -- 3.3 Ordering URLs in the Crawler's Frontier -- 4 Experimental Evaluation -- 4.1 Semantics-Aware Crawling Performance -- 5 Discussion -- 6

Conclusion -- References -- Related Terms --
 Chapter3ASEMANTICTREEREPRESENTATIONFORDOCUMENTCATEGORIZA
 TIONWITHACOMPOSITEKERNEL -- Abstract -- 1Introduction --
 2Relatedwork -- 3TheUMLSFramework -- 4DocumentModeling --
 5TheSemanticKernel -- 5.1TheMercerkernelframework -- 5.2TheUMLS-
 basedKernel -- 5.3TheConceptKernel -- 6ExperimentalEvaluation --
 6.1TheSVMClassifier -- 6.2TheMultinomialNaiveBayesClassifier -- 6.3
 Thecorpus -- 6.4Experimentalsetup -- 6.5Experimentalresults.
 6.6Discussionaboutthe2007CMCMedicalNLPChallenge -- 7Conclusion
 -- Acknowledgments -- References -- Chapter4ONTOLOGYREUSE-
 ISITFEASIBLE? -- 1Introduction -- 2OntologyReuse -- 2.1
 ProcessOverview -- 2.2StateofPractice -- 2.3Methodologies,
 MethodsandTools -- 3AnEconomicModelforOntologyReuse -- 3.1
 AnEconomicAnalysisofOntologyReuse -- 3.2
 TowardsanEconomicModelforOntologyReuse -- 3.2.1

 CalculatingtheRelativeCostsofOntologyReuse -- 3.3
 ApplicationoftheModel -- 4ConclusionsandOutlook -- References --
 Chapter 5 COMPUTATIONAL LOGIC AND KNOWLEDGE
 REPRESENTATION ISSUES IN DATA ANALYSIS FOR THE SEMANTIC WEB
 -- ABSTRACT -- 1 Introduction -- 2 Automated Reasoning for
 Ontology Engineering -- 2.1 Logical databases versus knowledge
 dynamism -- 3 Poor Representation and Deficient Ontologies -- 3.1
 Skolem noise and poor representation -- 3.2 A special case: Semantic
 Mobile Web 2.0 -- 4 When is an Ontology Robust? -- 4.1
 Representational perspective -- 4.2 Computational logic perspective --
 5 Lattice Categorical Theories as Robust Ontologies -- 5.1
 Computational viewpoint of ontological Extensions -- 5.2
 Representational perspective: Knowledge reconciliation and ontological
 extensions -- 5.3 Merging robust ontologies -- 5.4 Conservative
 retractions -- 5.5 Conservative retractions -- 6 Anomalies in
 Ontologies -- 6.1 Inconsistency: debugging, updating and beyond --
 6.2 Arguments, logic and trust -- 7 FOL as the Universal Provider for
 Formal Semantics -- 7.1 Model Theory for Semantic Web -- 8
 Untrustworthy Information Versus Ontology and Knowledge -- 8.1
 Mental attitudes and ontology reasoning -- 8.2 Emergent Ontologies
 -- 9 Understanding Ontologies: Mereotopology and Entailment-
 based Visualization -- 10 Meta-logical Trust -- 10.1 Extend OWL to
 ROWL.
 10.2 Verification of Description Logics -- 11 Final Remarks --
 Acknowledgments -- References --

 ontologiesdonotfollowstandardsforontologydesign -- 3.4
 Biologicalknowledgeiscontextdependant -- 3.5
 Dataprovenanceisofcrucialimportance --
 4BiologicaldataintegrationwithSemanticWebTechnologies -- 4.1
 Datagathering -- 4.2Dataconversion -- 4.3
 OntologyofgeneratedRDFdescriptions -- 4.4PrincipleofURLsencoding --
 4.5Unificationofresources -- 4.6Ontologiesmerging -- 4.7
 Datarepository -- 4.8InformationretrievalwithSPARQL --
 5Datavisualization -- 6Discussion -- 7Conclusion -- References --
 Chapter 7 AN ONTOLOGY AND PEER-TO-PEER BASED DATA AND
 SERVICE UNIFIED DISCOVERY SYSTEM -- ABSTRACT -- 1 Introduction
 -- 2 Preliminaries -- 2.1 Terms and definitions -- 2.2 Ontological

data -- 2.2.1 Resource domain ontology -- 2.2.2 Thesaurus ontology -- 2.2.3 Service description ontology -- 2.2.4 QoS ontology -- 2.3 JXTA -- 3. Design of Unified Discovery System -- 4 Combine with JXTA -- 5. Resource registry and discovery -- 5.1. Resource registry process -- 5.2 Resource discovery process -- 5.3 Algorithms -- 5.3.1 Getting group location algorithm -- 5.3.2 Locating resource algorithm -- 5.3.3 Service matching algorithm -- 6 Implementation and Experimental Results -- 7 Related Work -- 8 Conclusion -- References --

Chapter 8 THE DESIGN AND DEVELOPMENT OF A SEMANTIC ENVIRONMENT FOR HOLISTIC GOVERNMENT SERVICES -- Abstract -- 1 Introduction -- 2 Analysis of the problem & motivation -- 3 Related Work -- 4 Business Model -- 5 Life Events. The knowledge model -- 6 Semantics support -- 6.1 Semantics. 6.2 Applying semantics -- 7 Supporting Architecture -- 8 Les in motion -- 9 Conclusion -- 10 Acknowledgment -- References -- Chapter 9 SEMANTIC TOPIC MODELING AND ITS APPLICATION IN BIOINFORMATICS -- ABSTRACT -- 1 Introduction -- 2 Latent Dirichlet allocation (LDA) model -- 2.1 Model specification -- 2.2 Statistical learning -- 3 Applications of LDA in biomedical research -- 3.1 Identifying biological related topics -- 3.2 Enhancing text categorization with semantic-enriched representation and training data augmentation -- 3.3 Evaluating the functional coherence of protein groups -- 4 Discussion -- Acknowledgments -- References -- Chapter 10 SUPPORTING A USER IN HIS ANNOTATION AND BROWSING ACTIVITIES IN FOLKSONOMIES -- ABSTRACT -- 1 Introduction -- 2 Preliminaries -- 2.1 Basic Definitions -- 3 Phase 1: Neighborhood Computation -- 3.1 Step 2: Construction of the sets of candidate tags starting from TSetInput -- 3.2 Step 3: Construction of NeighTSetInput starting from the sets of candidate tags -- 4 Phase 2: Hierarchy Construction -- 4.1 The MST-based algorithm -- 4.2 The Concentric algorithm -- 5 Prototype Description -- 5.1 Class Diagram -- 5.2 Use Case and Sequence Diagrams -- 6 Experiments -- 7 Related Work -- 8 Conclusions -- References -- Chapter 11 DATA MANAGEMENT IN SENSOR NETWORKS USING SEMANTIC WEB TECHNOLOGIES -- ABSTRACT -- 1 Introduction -- 2 Sensor Networks -- 2.1 Sensor Nodes: Functionality and Characteristics -- 2.2 Sensor Networks Topologies -- 2.3 Application Areas -- 2.4 Sensor Web: Data and Services in a Sensor Network -- 3 Knowledge Management in Sensor Networks -- 3.1 Current Approaches -- 3.2 A Unifying Generic Architecture for Sensor Data Management -- 3.2.1 Data Layer -- 3.2.2 Processing Layer -- 3.2.3 Semantic Layer -- 3.2.4 Use Case Scenario. 4 Conclusions - Open Issues -- References -- Chapter 12 CHINESE SEMANTIC DEPENDENCY ANALYSIS -- ABSTRACT -- 1 Introduction -- 2 Semantic Annotation -- Semantic Role Labeling -- Semantic Dependency Analysis -- 3 Chinese Semantic Dependency Corpus and Tag Set -- 4 Semantic Dependency Relation Classification -- Mutli-Classifer Classification -- Classification Features -- Rule-Based Correction -- 5 Experimental Results -- 6 The SEEN System -- Syntatic Analysis Module -- Headword Assignment Module -- Semantic Dependency Assignment Module -- 7 Conclusion -- References -- Chapter 13 CREATING PERSONAL CONTENT MANAGEMENT SYSTEMS USING SEMANTIC WEB TECHNOLOGIES -- ABSTRACT -- 1 Introduction -- 2 Related Work -- 3 PCMS Metadata Model -- 3.1 Content-independent metadata -- 3.1.1 System Metadata -- 3.1.2 Security Metadata -- 3.1.3 User Metadata -- 3.2 Image-related Metadata -- 4 Semantic PCMS -- 4.1 Interoperability Issues -- 4.2 Semantic

Metadata Model -- 4.3 Lower layer -- 4.4 Mapping and rules -- 5
Metadata Service -- 5.1 Metadata Management -- 5.2 XML to RDF
Conversion -- 6 Use Case Scenario -- 6.1 Solving the Use Case
Scenario with the Proposed System -- 6.2 Solving the Use Case
Scenario with the Related Work -- 7 Conclusion -- 8
Acknowledgments -- References -- Chapter 14 A HYBRID DATA LAYER
TO UTILIZE OPEN CONTENT FOR HIGHER-LAYERED APPLICATIONS --
ABSTRACT -- 1 Introduction -- Resources and Open Content -- Web
3.0 alias Social Semantic Web behind the scenes -- 2 How to Utilize
Open Content for Higher-layered Applications? -- 3. State of the Art
and Related Work -- 4 qKAI Application Framework -- qKAI system
layer -- Data storage and change management -- Discovering Linked
Data by setting Points of Interest -- SQL replaces SPARQL -- Hybrid
knowledge index -- Change management.
Reusability and extensibility.
