

1. Record Nr.	UNINA9910825137503321
Titolo	Techniques for predicting metal mining influenced water / / edited by R. David Williams and Sharon F. Diehl
Pubbl/distr/stampa	Englewood, Colorado : , : Society for Mining, Metallurgy & Exploration, , 2014 ©2014
ISBN	1-68015-381-1 0-87335-397-8
Descrizione fisica	1 online resource (150 p.)
Collana	Management Technologies for Metal Mining Influenced Water ; ; Volume 5
Disciplina	628.1/6832
Soggetti	Mine drainage - Measurement Acid mine drainage - Environmental aspects Water - Pollution - Measurement Tailings (Metallurgy) - Environmental aspects
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	Techniques for Predicting Metal Mining Influenced Water is a must-read for planners, regulators, consultants, land managers, researchers, students, stakeholders, and others concerned about mining influenced water. Identifying potential mine wastes and their characteristics, and predicting their drainage quality are critical aspects of mine site design, operations, and closure planning. Failure to effectively conduct these evaluations for a mine site can result in environmental compliance issues that may create long-term financial liabilities. The fifth in a series of six handbooks on tech
