Sommario/riassunto	This volume will be of enormous interest and value to the growing number of people qualified both in the established and the new training societies for analysts and therapists, or studying to enter them. Within it theory and practice are closely interwoven, demonstrating how theories and models emerge, both from the study of earlier pioneering publications and from day to day experience, and are tested time and time again in the process of a group of practitioners accepting them as viable. An impressive and creative blend of the characteristics which this profession demands of its practitioners
