1. Record Nr. UNINA9910825207103321 Autore Lang Kenneth R. Titolo The life and death of stars / / Kenneth R. Lang Cambridge:,: Cambridge University Press,, 2013 Pubbl/distr/stampa **ISBN** 9781139612227 9781107016385 1-139-61036-8 1-107-23516-2 1-139-60877-0 1-139-61222-0 1-139-61594-7 1-139-06102-X 1-139-62524-1 1-283-87048-7 1-139-62152-1 Edizione [1st ed.] Descrizione fisica 1 online resource (xiv, 332 pages) : digital, PDF file(s) SCI005000 Classificazione Disciplina 523.8/8 Soggetti Stars - Formation Stars - Evolution Stellar dynamics Lingua di pubblicazione Inglese **Formato** Materiale a stampa Livello bibliografico Monografia Note generali Title from publisher's bibliographic system (viewed on 05 Oct 2015). Nota di bibliografia Includes bibliographical references and indexes. Nota di contenuto Light of the Sun -- Gravity and Motion -- Atomic and Subatomic Particles -- Transmutation of the Elements -- What Makes the Sun Shine? -- The Extended Solar Atmosphere -- Comparisons of the Sun with Other Stars -- The Lives of Stars -- The Material Between the Stars -- New Stars Arise from the Darkness -- Stellar End States -- A Larger. Expanding Universe -- Birth, Life, and Death of the Universe. In this well-illustrated text, Kenneth R. Lang explains the life cycle of Sommario/riassunto stars, from the dense molecular clouds that are stellar nurseries to the enigmatic nebulae some stars leave behind in their violent ends. Free of

mathematical equations and technical jargon, Lang's lively and accessible text provides physical insights into how stars such as our

Sun are born, what fuels them and keeps them bright, how they evolve and the processes by which they eventually die. The book demonstrates the sheer scope and variety of stellar phenomena in the context of the universe as a whole. Boxed focus elements enhance and amplify the discussion for readers looking for more depth. Featuring more than 150 figures, including color plates, The Life and Death of Stars is a modern and up-to-date account of stars written for a broad audience, from armchair astronomers and popular science readers to students and teachers of science.
