Autore	Lebel Jean <1963->
Titolo	Health : an ecosystem approach // by Jean Lebel
Pubbl/distr/stampa	Ottawa, : International Development Research Centre, c2003
ISBN	1-280-71796-3 9786610717965 1-55250-194-9
Descrizione fisica	1 online resource (100 p.)
Collana	In focus
Disciplina	363.7
Soggetti	Environmental degradation - Health aspects Ecological disturbances - Health aspects Environmental health - Citizen participation Environmental health - Research Public health - Citizen participation
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Issued also in French under title: La sante, une approche ecosystemique. Distributed by the Government of Canada Depository Services Program.
Nota di bibliografia	Includes bibliographical references: p. 68-83.
Nota di contenuto	Contents; Foreword; Preface; Chapter 1. The Issue; Chapter 2. The Approaches; Chapter 3. Lessons and Successes; Chapter 4. Recommendations and Future Directions; Appendix: Sources and Resources; The Publisher;
Sommario/riassunto	Can people remain healthy in a world that is sick? Many ecological disasters can be directly traced to careless exploitation of the environment, with human beings as first perpetrator and then victim. Our health closely mirrors the health of our surroundings: this is the basis of the Ecohealth approach. It recognizes the inextricable links between humans and their biophysical, social, and economic environments, and that these links are reflected in the population's state of health. Reconciling an ecosystem's health with the health of its human inhabitants is a new area of research, requiring i
