Sommario/riassunto	Universal in scope, yet focusing on recognizable Canadian places, this collection of essays connects individuals' love of nature to larger social issues, to cultural activities, and to sustainable technology. Subjects include activism in Cape Breton, eco-feminism, Native perspectives on

the history of humans' relationship with the natural world, the inconsistency of humankind's affinity with nature alongside its capacity to destroy, and scientific and traditional accounts of evolution and how they can come together for the welfare of Earth's ecology. These essays encourage us to break down
