The Growing Consensus on the Importance of Land Redistribution; Boxes; Figures; Tables; Part II. The Historical Origins of Land Concentration and Past Attempts to Redistribute Land; Part III. Ongoing Land Reform Programs, Their Mechanisms, Achievements, and Limitations; Part IV. The Wide Array of Objectives, Mechanisms, and Tools for Land Redistribution that Remain the Focus of Heated Debate Part V. How to Develop, Implement, and Monitor an Effective National Program of Land RedistributionIndex
Sommario/riassunto	Despite 250 years of land reform all over the World, important land inequalities remain, especially in Latin America and Southern Africa. While in these countries, there is near consensus on the need for redistribution, much controversy persists around how to redistribute land peacefully and legally, often blocking progress on implementation. This book focuses on the ""how"" of land redistribution in order to forge greater consensus among land reform practitioners and enable them to make better choices on the mechanisms of land reform.
