Sommario/riassunto

Die wegweisenden kollektiven Wohnbauten des Meisterarchitekten.
the Unité in Marseille (1945-1952) was a pioneering achievement at a
time when social housing in the post WWII years posed an immense
problem. Freed from restrictive regulations for the first time Le
Corbusier was able to put into practice his concept of modern social
housing. A milestone of modern architecture and subject of
controversial debate, the Unité in Marseille continues to attract
numerous visitors and students of architecture. This volume is the
latest addition to Birkhäuser's series of guides to Le Corbusier's most
acclaimed buildings, and includes an additional chapter on his Unités in
Rezé-les-Nantes, Briey en Forêt, Firminy and Berlin. The author, a
practising architect and well known le Corbusier specialist, lives in
Marseille and teaches at the Ecole d'architecture de Marseille-Luminy.
