Sommario/riassunto

This book addresses a range of issues surrounding the search for scientific truths in the study of international conflict and international political economy. Unlike empirical studies in other disciplines, says Seung-Whan Choi, many political studies seem more competent at presenting theoretical conjecture and hypotheses than they are at performing rigorous empirical analyses. When we study global issues like democratic institutions, flows of foreign direct investment, international terrorism, civil wars, and international conflict, we often uncritically adopt established theoretical framework
