

1. Record Nr.	UNINA9910825561503321
Autore	Khutoryanskiy Vitaliy
Titolo	Temperature-responsive polymers : chemistry, properties and applications / / edited by Vitaliy V. Khutoryanskiy and Theoni K. Georgiou
Pubbl/distr/stampa	Hoboken, NJ : , : Wiley, , 2018
ISBN	1-119-15780-3 1-119-15779-X 1-119-15783-8
Edizione	[1st edition]
Descrizione fisica	1 online resource (409 pages)
Disciplina	668.9
Soggetti	Polymers Thermoresponsive polymers
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>An authoritative resource that offers an understanding of the chemistry, properties and applications of temperature-responsive polymers. With contributions from a distinguished panel of experts, Temperature-Responsive Polymers puts the focus on hydrophilic polymers capable of changing their physicochemical properties in response to changes in environmental temperature. The contributors review the chemistry of these systems, and discuss a variety of synthetic approaches for preparation of temperature-responsive polymers, physicochemical methods of their characterisation and potential applications in biomedical areas. The text reviews a wide-variety of topics including: The characterisation of temperature-responsive polymers; Infrared and Raman spectroscopy; Applications of temperature-responsive polymers grafted onto solid core nanoparticles; and much more. The contributors also explore how temperature-responsive polymers can be used in the biomedical field for applications such as tissue engineering. This important resource: Offers an important synthesis of the current research on temperature-responsive polymers. Covers the chemistry, the synthetic approaches</p>

for presentation and the physiochemical method of temperature-responsive polymers Includes a review of the fundamental characteristics of temperature-responsive polymers Explores many of the potential applications in biomedical science, including drug delivery and gene therapy Written for polymer scientists in both academia and industry as well as postgraduate students working in the area of stimuli-responsive materials, this vital text offers an exploration of the chemistry, properties and current applications of temperature-responsive polymers.
