Sommario/riassunto	Hospitals have been existing in one form or the other since time immemorial but there never had been so much concern about the waste generated by them. The implications of hospital wastes are manifold. Now hospital waste management is one of the thrust areas which are drawing attention of health authorities and also the government. Hospital waste management requires commitment from persons at all the levels of the health care facility. The present interventional study was conducted to assess the knowledge, attitude and practice about hospital waste management and to provide training programme o
