1. Record Nr. UNINA9910825596303321

Autore	Riccomi Giulia
Titolo	Bioarchaeology and Dietary Reconstruction Across Late Antiquity and the Middle Ages in Tuscany, Central Italy / / Giulia Riccomi
Pubbl/distr/stampa	Oxford : , : Archaeopress, , 2021 ©2021
ISBN	1-78969-866-9
Edizione	[1st ed.]
Descrizione fisica	1 online resource (192 pages)
Disciplina	945/.501
Soggetti	Excavations (Archaeology) - Italy - Tuscany Food habits - Italy - Tuscany - History - To 1500 Human remains (Archaeology) - Italy - Tuscany Biochemical markers - Italy - Tuscany Tuscany (Italy) History To 1434 Tuscany (Italy) Civilization
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia

Sommario/riassunto

This volume presents the first multidisciplinary bioarchaeological analysis to reconstruct life conditions in ancient Tuscany between Late Antiquity and the Middle Ages. This was done through the examination of stress markers, including adult stature, periosteal reaction, cranial porosities, linear enamel hypoplasia and paleodietary reconstruction.
