Chapter 19 Audit and evaluation of a perioperative service;
Chapter 20 Developing a competency framework for preoperative assessment;
Chapter 21 Developing protocol and guidance to support assessment services; Appendix; Index

Sommario/riassunto

Pre operative assessment of the surgical patient is a key part of the perioperative process. However, it is one that cannot be separated from the other aspects of perioperative management, both clinical and administrative, that ensures the safe and effective treatment of surgical patients. There are a number of books on the market that examine perioperative management anaesthesia and surgical nursing that are only able to touch on the pre-operative assessment process. Pre Operative Assessment & Perioperative Management sets out to be different, by bridging the gap between these texts and the e
