

1. Record Nr.	UNINA9910825899703321
Autore	Dali Myriam
Titolo	A theory of distributed number / Myriam Dali, Eric Mathieu
Pubbl/distr/stampa	Amsterdam ; Philadelphia, : John Benjamins, [2021] ©2021
Descrizione fisica	1 online resource (167 pages)
Collana	Linguistik Aktuell/Linguistics Today ; volume 269
Altri autori (Persone)	MathieuEric <1967->
Disciplina	415
Soggetti	Grammar, Comparative and general - Number
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	The nP domain -- The lower NumP domain -- The higher NumP domain -- Broken plurals and interpretation -- Bare plurals -- Number and diachrony.
Sommario/riassunto	"The objective of this book is to develop a deeper understanding of the form and interpretation of number. Using insights from Generative syntax and Distributed Morphology, we develop a theory of distributed number, arguing that number can be associated with several functional heads and that these projections exist depending on the features they specify. In doing so, we make a strong claim for a close mapping between the syntactic structure and the semantics in the noun phrase, since each node corresponds to a different interpretation of number. Despite some technical implementations, the book is accessible to linguists working outside any particular syntax-semantic framework, since we propose generalizations that are applicable in many, if not all, models of grammar. The book focuses on Arabic, but also discusses a number of languages including English, French, Ojibwe, Blackfoot, Hebrew, Japanese, Korean, Chinese, Turkish, Persian, and Western Armenian"--
