

1. Record Nr.	UNINA9910825945403321
Autore	Teisch Jessica B
Titolo	Engineering nature : water, development, & the global spread of American environmental expertise // Jessica B. Teisch
Pubbl/distr/stampa	Chapel Hill [N.C.], : University of North Carolina Press, c2011
ISBN	1-4696-0351-9 0-8078-7801-4
Edizione	[1st ed.]
Descrizione fisica	1 online resource (273 p.)
Disciplina	333.70973
Soggetti	Water resources development - United States - History Mining engineering - United States - History Water resources development - History Mining engineering - History
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Lessons of valuable experience : what California learned from India -- A great mission for the race : lessons and experiences from California -- The California model and the Australian awakening -- Home is not so very far away : civilizing the South African frontier -- Nothing but commercial feudalism : California's Hawaiian empire -- Palestine's peculiar social experiments.
Sommario/riassunto	Focusing on globalization in the late nineteenth and early twentieth centuries, Jessica Teisch examines the processes by which American water and mining engineers who rose to prominence during and after the California Gold Rush of 1849 exported the United States' growing technical and environmental knowledge and associated social and political institutions. In the frontiers of Australia, South Africa, Hawaii, and Palestine--semiarid regions that shared a need for water to support growing populations and economies--California water engineers applied their expertise in irrigation and mining proj
