

1. Record Nr.	UNINA9910825951903321
Autore	Burg Stanley P. <1933->
Titolo	Postharvest physiology and hypobaric storage of fresh produce // Stanley P. Burg
Pubbl/distr/stampa	Wallingford, Oxon, UK ; ; Cambridge, MA, USA, : CABI Pub., c2004
ISBN	1-280-86630-6 9786610866304 0-85199-969-7
Edizione	[1st ed.]
Descrizione fisica	1 online resource (670 p.)
Altri autori (Persone)	BurgStanley P. <1933->
Disciplina	631.5/68
Soggetti	Fruit - Postharvest physiology Vegetables - Postharvest physiology Fruit - Storage Vegetables - Storage
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 543-629) and index.
Nota di contenuto	Preface; Acknowledgements; 1 Introduction; 2 Origins of the LP Concept; 3 Gas and Vapour Mass Transport; 4 Oxygen, Carbon Dioxide, Ammonia and Cyanide; 5 Ethylene; 6 Heat Transfer and Water Loss; 7 Postharvest Diseases and Physiological Disorders; 8 Insect Quarantine; 9 Technical Difficulties Associated with Laboratory Hypobaric Research; 10 Horticultural Commodity Requirements; 11 Meat Storage; 12 Warehouse Design; 13 Intermodal Container Design; 14 Conclusions; 15 Appendix - Influence of LP on Physical, Biological and Chemical Parameters j *; Bibliography; Index
Sommario/riassunto	This book is the definitive reference work documenting and evaluating hypobaric (low pressure) storage and is written by the world's leading authority on the subject. It is a detailed account of the mechanisms of postharvest gas exchange, heat transfer and water loss in fresh produce, and the effect of hypobaric conditions on each process. The book also contains a critical review of all available information on hypobaric storage, this includes horticultural commodity requirements, laboratory research, and the design of hypobaric warehouses and transportation containers.
