

1. Record Nr.	UNINA9910825974003321
Titolo	Silica nanoparticles [[electronic resource]] : preparation, properties and uses // Juan Vivero-Escoto, editor
Pubbl/distr/stampa	New York, : Nova Science Publishers, c2012
ISBN	1-62257-030-8
Edizione	[1st ed.]
Descrizione fisica	1 online resource (302 p.)
Collana	Nanaotechnology science and technology Chemical engineering methods and technology
Altri autori (Persone)	Vivero-EscotoJuan
Disciplina	620.1/93
Soggetti	Nanosilicon Nanoparticles Biotechnology - Materials Silica dust - Industrial applications
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- SILICA NANOPARTICLES PREPARATION, PROPERTIES AND USES -- SILICA NANOPARTICLES PREPARATION, PROPERTIES AND USES -- Library of Congress Cataloging-in-Publication Data -- CONTENTS -- PREFACE -- Chapter 1 SILICA NANOPARTICLE AS CARRIER FOR BIOSENSING -- ABSTRACT -- 1. INTRODUCTION -- 2. SYNTHESIS OF SILICA-BASED NPS -- 3. DOPED SILICA NPS -- 3.1. Luminophore-Doped Silica NPs -- 3.2. Quantum Dots-Doped Silica NPs -- 3.3. Magnetic Particles-Doped Silica NPs -- 3.4. Noble Metal Particles-Doped Silica NPs -- 3.5. Bifunctional Silica-Based NPs -- 4. CONJUGATION OF SILICA-BASED NPS WITH DESIRED BIOMOLECULES -- 4.1. Physisorption of Biomolecules -- 4.2. Entrapment of Biomolecules by the Sol-Gel Method -- 4.3. Affinity-Based Interactions -- 4.4. Covalent Binding -- 5. SILICA-BASED NPS AS CARRIERS FOR BIOSENSING -- 5.1. Targeting of Cells -- 5.2. Ultrasensitive DNA Detection -- 5.3. Biosensors -- 5.4. Immunoassay -- CONCLUSION -- REFERENCES -- Chapter 2 REACTIVITY OF INORGANIC RADICALS AND EXCITED TRIPLET STATES IN COLLOIDAL SILICA SUSPENSIONS -- ABSTRACT -- 1. INTRODUCTION -- 2. QUENCHING OF BENZOPHENONE TRIPLET STATES BY MODIFIED SILICA NANOPARTICLES -- 2.1. Time- Resolved Phosphorescence

Experiments -- 2.2. Laser Flash-Photolysis (LFP) Experiments -- 2.2.1. LFP with BP Solutions -- 2.2.2. LFP with NP1 and NP2 Suspensions in BP Solutions -- 3. REACTION MECHANISMS OF INORGANIC RADICALS AT THE SILICA/WATER INTERFACE -- 3.1. Generation of Grafted Radicals -- 3.2. SO₄⁻ -- 3.2.1. NPS Formation and Reactivity -- 3.2.2. SiO₂ Formation and Reactivity -- 3.2. Cl⁻ / Cl₂⁻ -- 3.3. HPO₄⁻ -- 3.4. (SCN)₂ -- CONCLUSION -- REFERENCES -- Chapter 3 MULTIFUNCTIONAL MESOPOROUS SILICA NANOPARTICLES FOR CONTROLLED DRUG DELIVERY, MULTIMODAL IMAGING AND SIMULTANEOUS IMAGING AND DRUG DELIVERY -- DEDICATION -- ABSTRACT -- 1. INTRODUCTION. 2. MSN-BASED CONTROLLED DRUG DELIVERY SYSTEMS -- 2.1. MSN-Based Stimuli-Responsive Drug Delivery Systems -- 2.2. MSN-Based Internal Stimuli-Responsive Drug Delivery Systems -- 2.2.1. pH -- 2.2.2. Redox Potential -- 2.2.3. Biomolecules -- 2.3. External Stimuli-Responsive Drug Release -- 2.3.1 Radiation -- 2.3.2. Oscillating Magnetic Field -- 3. MSN-BASED IMAGING PROBES -- 3.1. MSN-Based Optical Imaging Agents -- 3.2. MSN-Based MR Imaging Agents -- 4. BIOCOMPATIBILITY, PHARMACOKINETICS AND BIODISTRIBUTION OF MESOPOROUS SILICANANOPARTICLES -- 5. IN VIVO SIMULTANEOUS IMAGING AND DRUG DELIVERY -- CONCLUSION -- ACKNOWLEDGMENTS -- REVIEWED BY -- REFERENCES -- Chapter 4 MESOPOROUS SILICA NANOPARTICLES AS A DRUG DELIVERY SYSTEM -- ABSTRACT -- 1. INTRODUCTION -- 2. SILICA PREPARATION METHODS -- 2.1. Conventional Preparation Method -- 2.2. Fluorescent Silica Nanoparticles -- 2.3. Functionalised Silica Nanoparticles -- 3. INFLUENCE OF STRUCTURAL CHARACTERISTICS -- 3.1. Pore Size -- 3.2. Surface Area -- 3.3. Pore Volume -- 4. SILICA NANOPARTICLES AS A DRUG DELIVERY SYSTEM -- 4.1. Controlled Drug Delivery -- 4.2. MSNs in Cancer Treatment -- 4.3. MSNs as Biosensors -- 4.4. Gatekeeping -- 5. BIOCOMPATIBILITY OF SILICA NANOPARTICLES -- 5.2. Cellular Uptake -- 5.3. Cytotoxicity -- REFERENCES -- Chapter 5 SILICA-BASED HYBRID NANOMATERIALS WITH WELL-DEFINED ARCHITECTURES -- ABSTRACT -- 1. INTRODUCTION -- 2. FABRICATION OF SILICA NANOSTRUCTURES -- 2.1. Solid Silica Nanostructures -- 2.2. Hollow Silica Nanostructures -- 2.3. Nanoporous Silica Nanostructures -- 2.4. Other Silica Nanostructures -- 3. SILICA/POLYMER HYBRID NANOSTRUCTURES -- 3.1. Polymer Grafting from Silica Surfaces -- 3.2. Silica Deposited onto Polymer Self-Assembled Architectures -- 4. SILICA/METAL NANOPARTICLES HYBRID NANOSTRUCTURES -- 4.1. Surfaces Immobilized Metal Nanoparticles. 4.2. Matrix Entrapped Metal Nanoparticles -- 4.2.1. Route I to Silica/Metal Nanostructures -- 4.2.2. Route II to Silica/Metal Nanostructures -- 4.3. Rattle-Like Silica/Metal Nanoparticle Hybrids -- 5. SILICA/CARBON NANOSTRUCTURES -- 5.1. Silica/CNT Hybrid Nanostructures -- 5.1.1. Covalent Processes -- 5.1.2. Non-Covalent Processes -- 5.2. Silica/Graphene Sheets Nanostructures -- 5.3. Other Silica/Carbon Nanomaterials -- 6. SILICA-BASED JANUS NANOSTRUCTURES -- 7. CHALLENGES AND OUTLOOK -- ACKNOWLEDGMENTS -- REFERENCES -- Chapter 6 FUNCTIONAL SILICA NANOPARTICLES SYNTHESIZED BY WATER-IN-OIL MICROEMULSION -- ABSTRACT -- 1. INTRODUCTION -- 1.1. Interest of Functional Nanoparticles and Interest of Silica as Matrix -- 1.2. Possibilities for the Synthesis of Silica Nanoparticles -- 1.3. Synthesis of Silica Nanoparticles by Water-in-Oil Microemulsion -- 1.4. Different Synthesis Strategies -- 1.5. Different Nanoparticle Microstructures -- 1.6. A Wide Range of Already-Published Materials -- 1.7. Complementary of Microemulsions to Other Techniques -- 1.8. Surface Functionalization in Microemulsions -- 1.9. Our Materials and Chapter

Topic -- 2. SYNTHESIS OF THE FUNCTIONAL SILICA NANOPARTICLES --
2.1. Water-in-Oil Microemulsions -- 2.2. Silica Synthesis in Water-in-
Oil Microemulsions -- 2.3. Washing and Collection of the Silica
Nanoparticles -- 2.4. Experimental Part -- 3. CHARACTERIZATIONS
AND POTENTIAL APPLICATIONS OF THE FUNCTIONAL SILICA
NANOPARTICLES -- 3.1. SiO₂ Nanoparticles for Scratch Resistant Glass
-- 3.2. CeO₂@SiO₂ Anti-UV Nanoparticles -- 3.3. ZnFe₂O₄@SiO₂ and
-Fe₂O₃@SiO₂ Magnetic Nanoparticles -- 3.4. Cluster@SiO₂
Luminescent Nanoparticles -- 3.5. -Fe₂O₃-Cs₂[Mo₆Br₁₄]@SiO₂ Bi-
Functional Nanoparticles -- CONCLUSION -- ACKNOWLEDGMENTS --
REFERENCES -- Chapter 7 BIOMEDICAL APPLICATIONS OF NANOSILICA
-- ABSTRACT -- INTRODUCTION.
SILICA NANOPARTICLES -- Preparation and Properties of Silica
Nanoparticles -- Modification by Chemical Interaction -- Modification
by Physical Interaction -- Applications -- DRUG DELIVERY SYSTEMS --
Polymers Used in Drug Delivery Systems -- Application of Nanosilica in
Drug Delivery -- TISSUE ENGINEERING -- Biomaterials and Tissue
Engineering -- Polymers Used in Tissue Engineering Scaffolds --
Synthetic Polymers -- Natural Polymers -- Application of Nanosilica in
Tissue Engineering -- DENTISTRY -- LIGHT-CURED DENTAL
NANOCOMPOSITES -- APPLICATION OF NANOSILICA IN DENTISTRY --
CONCLUSION -- REFERENCES -- Chapter 8 MONODISPERSE
LUMINESCENT SILICA NANOPARTICLES: SYNTHESIS,
CHARACTERIZATION AND APPLICATION TO THE DNA MICROARRAY
TECHNOLOGY -- ABSTRACT -- 1. INTRODUCTION -- 2. SYNTHESIS,
FUNCTIONALIZATION AND CHARACTERIZATION OF DYE DOPED SILICA
NANOPARTICLES -- 2.1. Synthesis and Functionalization Procedure --
2.2. Optimization of Dye Loading -- 2.3. Influence of APTES -- 2.4.
Influence of NH₃ -- 2.5. Diluted Synthesis -- 3. APPLICATION OF DYE
DOPED NANOPARTICLES TO DNA MICROARRAY TECHNOLOGY -- 3.1.
Bioconjugation of Nanoparticles with Streptavidin -- 3.2. HPV Probe
Oligonucleotide Design and Microarray Printing -- 3.3. PCR
Amplification of the Sample DNA Strands and Hybridization -- 3.4.
Application to the DNA Microarray Technology for HPV Detection --
CONCLUSION -- ACKNOWLEDGMENTS -- REFERENCES -- Chapter 9
DEGREE OF DISPERSION AND COAGULATION OF SILICA
NANOPARTICLES DETERMINED BY USING AN ELECTRIC FIELD --
INTRODUCTION -- METHODOLOGY -- RESULTS AND DISCUSSION --
Effect of Supply Voltages -- Mechanism Verification: Configuration of
Pearl Chains under an Electric Field -- CONCLUSION -- REFERENCES --
Chapter 10 TEMPERATURE-RESPONSIVE DNA-CAPPED MESOPOROUS
SILICA NANOPARTICLES BASED DELIVERY SYSTEM -- DEDICATION --
ABSTRACT -- INTRODUCTION.
RESULTS AND DISCUSSION -- CONCLUSION -- EXPERIMENTAL SECTION
-- Reagents and Materials -- Characterization of Materials -- Synthesis
of PAP-MSNs -- Loading of the [Ru(bipy)₃]²⁺ Complex to PAP-MSNs --
Capping of [Ru(bipy)₃]²⁺-Loaded PAP-MSNs with ds-Oligonucleotides
-- Release of [Ru(bipy)₃]²⁺ from Oligo-Capped [Ru(bipy)₃]²⁺-Loaded
PAP-MSNs -- ACKNOWLEDGMENTS -- REVIEWED BY -- REFERENCES --
