Sommario/riassunto

This translation of L"*apocalittica giudaica e la sua storia* makes Professor Sacchi's innovative thesis on Jewish apocalyptic available to a wider, English-reading audience. Sacchi argues that the term "apocalyptic" is a modern invention, deriving from the wish to conceptualize the field of research on the affinities between the Apocalypse of John and other works of its time. These affinities do not just relate to literary character and form but also in part to content. Focusing on the material of "Enoch" Sacchi concludes that what is needed is a more precise, literary and historical defi

Sommario/riassunto

The primary focus of this book is the laws of war, also referred to as the international law of armed conflict and international humanitarian law. There are two aspects to the laws of war, *jus ad bellum*, the rules governing resort to armed conflict, and *jus in bello*, the rules governing the conduct of armed conflict. The purpose of the book is to inform police officials about the latter. It is also written for other State officials, including the military, who may carry out police operations, educators and trainers of police and those who monitor or investigate police or otherwise seek to hold them accountable. In addition to considering rules of behaviour in actual armed conflict, the book focuses on police conduct in those forms of conflict that fall below the armed conflict threshold, that is to say situations of internal disturbance and tension. Whilst the laws of war are not legally applicable in such situations, it is argued here that some of its principles and provisions should form an important element in the strategy and tactics of policing civil disturbances, especially when they are serious in terms of scale or intensity of violence.
