Sommario/riassunto

The 5-Minute Anesthesia Consult provides a readily accessible compilation of anesthesia topics that is useful to students, residents, physicians, certified nurse anesthetists, anesthesia assistants, and ancillary medical staff. Following the highly successful format of the 5-Minute Clinical Consult series, 480 topics will be covered, each in a highly formatted two-page spread covering risk factors and epidemiology, preoperative evaluation, intraoperative care and postoperative care. The topic specific format of each chapter provides a focused, evidence-based, yet simplified, discussion of Physiology, Management, Co-Existing Disease, Surgical Procedure, and Drug topics. In addition to general operative and perioperative care, this comprehensive book also covers subspecialty topics in cardiac, neurosurgical, obstetric, geriatric, critical care, pediatric, regional, vascular, thoracic, and acute and chronic pain.
