Sommario/riassunto

Cultural Memory, a subtle and comprehensive process of identity formation, promotion and transmission, is considered as a set of symbolic practices and protocols, with particular emphasis on repositories of memory and the institutionalized forms in which they are embodied. High and low culture as texts embedded in the texture of memory, as well as material culture as a communal receptacle and reservoir of memory are analysed in their historical contingency. Symbolic representations of accepted and counter history/ies, and the cultural nodes and mechanisms of the cultural imaginary are also issues of central interest. Twenty-six contributions tackle these topics from a theoretical and historical perspective and bring to the fore case studies illustrating the interdisciplinary agenda that underlies the volume.
