

1. Record Nr.	UNINA9910826096403321
Autore	Philibert Jean
Titolo	Thermodynamics and phase transformations : the selected works of Mats Hillert / / Jean Philibert [and four others]
Pubbl/distr/stampa	Les Ulis : , : EDP Sciences, , [2006] ©2006
ISBN	1-280-96108-2 9786610961085 1-4356-0989-1 2-7598-0247-7
Descrizione fisica	1 online resource (522 p.)
Collana	Science des matériaux
Disciplina	541.363
Soggetti	Phase rule and equilibrium Phase transformations (Statistical physics) - Data processing
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	A short biography of Mats Hillert; Foreword; List of contributors; Contents; Chapter 1 - Introduction to "Nuclear Reaction Radiography"; Chapter 2 - Introduction to "Paraequilibrium"; Chapter 3 - Introduction to "Pressure-Induced Diffusion and Deformation during Precipitation, Especially Graphitization"; Chapter 4 - Introduction to "The Role of Interfacial Energy during Solid State Phase Transformations"; Chapter 5 - Introduction to "Thermodynamics of Martensitic Transformations"; Chapter 6 - Introduction to "The Growth of Ferrite, Bainite and Martensite" Chapter 7 - Introduction to "A solid Solution Model for Inhomogeneous Systems"Chapter 8 - Introduction to "The Formation of Pearlite"; Chapter 9 - Introduction to "On the Theory of Normal and Abnormal Grain Growth"; Chapter 10 - Introduction to "Grey and White Solidification of Cast Iron"; Chapter 11 - Introduction to two papers by Mats Hillert: "The Role of Interfaces in Phase Transformations"; Chapter 12 - Introduction to "The Regular Solution
Sommario/riassunto	This book is a compendium of Mat Hillert's publications. Mat Hillert is a world specialist in metal alloy at the origin of a universal computing

code used to calculate the diagrams of phase. This work is in English.
