Sommario/riassunto	Environmental information is important for successful planning and execution of naval operations. To ensure that naval forces have the

most up-to-date capacities, ONR has extensive environmental research program. To increase research community understanding of the operational demands placed on naval operations and to facilitate discover between these two groups, the NRC's Ocean Studies Board, working with ONR, convened fire previous symposiums on tactical oceanography. The sixth and latest symposium in this series was held February 1999 in Corpus Christi, Texas.
