

1. Record Nr.	UNINA9910826197003321
Autore	Choudhri Ehsan
Titolo	The Exchange Rate Pass -Through to Import and Export Prices : : The Role of Nominal Rigidities and Currency Choice // Ehsan Choudhri, Dalia Hakura
Pubbl/distr/stampa	Washington, D.C. : , : International Monetary Fund, , 2012
ISBN	1-4755-5240-8 1-4755-8061-4
Edizione	[1st ed.]
Descrizione fisica	1 online resource (35 p.)
Collana	IMF Working Papers IMF working paper ; ; WP/12/226
Altri autori (Persone)	HakuraDalia
Disciplina	658.3894
Soggetti	Exchange rate pass-through Prices Currencies Currency Deflation Exchange rates Export prices Exports Foreign Exchange Foreign exchange Government and the Monetary System Import prices Imports Inflation International Policy Coordination and Transmission Macroeconomics Monetary economics Monetary Policy Monetary Systems Money and Monetary Policy Money Open Economy Macroeconomics Payment Systems Price Level Regimes Standards United States

Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"September 2012."
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Cover; Contents; I. Introduction; II. Empirical Evidence; III. The Model; A. Basic Setup; B. Key Relations; IV. Quantitative Analysis; A. Key Determinants of the Pass-Through to Trade Prices; B. Currency of Invoicing and the Pass-Through; V. Concluding Remarks; References; Tables; 1. OLS Regressions: Impact of Exchange Rate Changes on Trade Prices, 1979-2010; 2. VAR: First Quarter Trade Price Response to a One Percent Change in the Exchange Rate, 1979-2010; 3. Pass-Through Elasticities for Different Shocks 4. Wage-Price Stickiness, Exchange Rate Persistence, Inflation Reaction and the Pass-Through5. Stochastic Simulations; 6. Invoicing Currency Shares and the Pass-Through; Figures; 1. Regression and VAR Estimates of the Pass-Through; 2. Impulse Response Functions; 3. PCP Shares and the Pass-Through; Appendix Tables; 1. VAR: First Quarter Trade Price Response to a One Percent Change in the Exchange Rate 1985-1997; 2. VAR: First Quarter Trade Price Response to a One Percent Change in the Exchange Rate 1998-2010
Sommario/riassunto	Using both regression- and VAR-based estimates, the paper finds that the exchange rate pass-through to import prices for a large number of countries is incomplete and larger than the pass-through to export prices. Previous studies have reported similar results, which give rise to the puzzle that while local currency pricing is needed to account for incomplete import price pass-through, it would not imply a lower export price pass-through. Recent explanations of this puzzle have emphasized markup adjustment in response to exchange rate changes. This paper suggests an alternative explanation based on the presence of both producer and local currency pricing. Using a dynamic general equilibrium model, the paper shows that a mix of producer and local currency pricing can explain the pass-through evidence even with a constant markup. The model can also explain the observed exchange rate and inflation variability as well as the fact that the regression and VAR estimates tend to be similar.
