Sommario/riassunto

What does it mean to “fit in?” In this volume of essays, editors Günther Schlee and Alexander Horstmann demystify the discourse on identity, challenging common assumptions about the role of sameness and difference as the basis for inclusion and exclusion. Armed with intimate knowledge of local systems, social relationships, and the negotiation of people’s positions in the everyday politics, these essays tease out the ways in which ethnicity, religion and nationalism are used for social integration.

2. Record Nr.	UNINA9910826200503321

Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	ECGs for Nurses, Second Edition; Contents; Foreword; Acknowledgements; 1: The Conduction System in the Heart; 2: Principles of ECG Monitoring; 3: ECG Interpretation of Cardiac Arrhythmias; 4: Cardiac Arrhythmias Originating in the SA Node; 5: Cardiac Arrhythmias Originating in the Atria; 6: Cardiac Arrhythmias

Originating in the AV Junction; 7: Cardiac Arrhythmias Originating in the Ventricles; 8: Cardiac Arrhythmias with Atrioventricular Block; 9: Cardiac Arrhythmias Associated with Cardiac Arrest; 10: Recording a 12 Lead ECG; 11: Interpreting a 12 Lead ECG
12: Management of Peri-arrest Arrhythmias 13: Record Keeping; Appendix; Index

Sommario/riassunto

ECGs for Nurses provides everything the nurse needs to know about the electrocardiogram. Accessible yet comprehensive, and packed with case studies, this portable guide enables nurses to become skilled practitioners in an area often seen as highly complex. Using real ECG traces as examples, possible effects on the patient and treatment options are discussed, with a focus on the role of the nurse. This fully illustrated second edition remains the essential reference guide for nurses working in all acute areas, as well as general nurses and students learning about ECGs for the first time.<
