| Sommario/riassunto      | The volume traces the controversy that revolves around the bio-cultural relationships of Archaic (Neanderthal) and Modern humans at global and regional, Levantine scales. The focus of the book is on understanding the degree to which the behavioral organization of Archaic groups differed from Moderns. To this end, a case study is presented for a 44-70,000 year old, Middle Paleolithic occupation of a               |

Jordanian rockshelter. The research, centering on the spatial analysis of artifacts, hearths and related data, reveals how the Archaic occupants of the shelter structured their activities and placed
