Disciplina	820.9003
Soggetti	Material culture - History - Europe, Western Material culture - History - East Asia East Asia Western Europe
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Geography and demography -- Energy -- Resources -- Agriculture -- Exchanges -- Stagnation and growth -- Sources of growth? Changes in production and transport -- Sources of growth? Markets and states -- The great divergence -- Review and reflection.
Sommario/riassunto	Large-scale comparative economic history of westernmost and easternmost Eurasia is of importance for the understanding of global history. The book provides a description of material life in North-western Europe and East Asia, for the period from the late fifteenth to the late nineteenth centuries, with a focus on developments in Great Britain and the Dutch Republic on the one hand and China and Japan on the other hand. Like an atlas it provides information, in an accessible format, on the main characteristics of the economic landscape of this period. Maps, tables, graphs and figures are a prominent and integral part of the book. It shows the constraints to which all pre-industrial economies were subjected because of their dependence on organic natural resources but also the different ways in which the societies discussed dealt with those constraints. To provide a better understanding of this economy of limited possibilities, the final chapter

of the book is devoted to the emergence of modern economic growth
in Western Europe.
