

1. Record Nr.	UNINA9910826463903321
Autore	Thompson Jason Randall <1969->
Titolo	Anthropological research framing for archaeological geophysics : material signatures of past human behavior // Jason Randall Thompson
Pubbl/distr/stampa	Lanham, Maryland : , : Rowman & Littlefield, , 2015 ©2015
ISBN	0-7391-7759-1
Descrizione fisica	1 online resource (153 p.)
Disciplina	930.1028
Soggetti	Geophysics in archaeology - Research Prehistoric peoples - Research Antiquities, Prehistoric - Research Social archaeology - Research Ethnoarchaeology - Research Archaeology - Methodology Anthropology - Methodology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Geophysical technology commonly applied in archaeology -- Bridging gaps -- The nature of a problem -- Towards using AGP anthropologically in archaeology -- Introduction to research frames : relations between research procedures and research goals -- Success at Verberie -- Failure at 13DB674 in Iowa or redefinition of success? -- Framing testable humanistic hypotheses for AGP -- Ideas for how to do this.
Sommario/riassunto	"Anthropological Research Framing for Archaeological Geophysics addresses the gap between humanistic anthropological archaeology and geophysical archaeology. It initiates and invites professional dialogue toward providing archaeological geophysics with anthropological premises"--Provided by publisher.
