Sommario/riassunto	This book deals with the questions of how global governance can and ought to effectively address serious global problems, such as financial instability, military conflicts, distributive injustice and increasing concerns of ecological disasters. Providing a unified theoretical framework, the contributors to this volume utilise argumentation research, broadening the concept by identifying the concerns about agency, lifeworld and shared reasoning that different strands of argumentation research have in common. Furthermore, they develop the concept of argumentative deontology in o
