Discussion and conclusion: Is CAP moving backwards?; References

10. The Fate of Green Direct Payments in the CAP Reform Negotiations

Sommario/riassunto

This book is the first to document the reform of the EU's Common Agricultural Policy (CAP) and to analyse the political and economic factors which determined the outcome of the negotiations. The policy (non-)reform will affect the world's global food security and agricultural commodity markets and will cost the EU 3.5 trillion Euro over the next 7 years.

Contributors include top political negotiators and leading EU experts and academic analysts.
