

1. Record Nr.	UNINA9910826543603321
Titolo	Microglia [[electronic resource] ] : biology, functions and roles in disease // Charanjit Kaur and Ling Eng-Ang, editors
Pubbl/distr/stampa	New York, : Nova Science Publishers, Inc., c2012
ISBN	1-61942-252-2
Edizione	[1st ed.]
Descrizione fisica	1 online resource (331 p.)
Collana	Cell biology research progress
Altri autori (Persone)	KaurCharanjit Eng-AngLing
Disciplina	616.8/0471
Soggetti	Nervous system - Degeneration Microglia
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"Nova biomedical."
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- MICROGLIA: BIOLOGY, FUNCTIONS AND ROLES IN DISEASE -- MICROGLIA: BIOLOGY, FUNCTIONS AND ROLES IN DISEASE -- LIBRARY OF CONGRESS CATALOGING-IN-PUBLICATION DATA -- CONTENTS -- PREFACE -- REFERENCE -- Chapter 1: MICROGLIA IN THE DEVELOPING BRAIN -- ABSTRACT -- ABBREVIATIONS -- I. INTRODUCTION -- II. MICROGLIAL PHENOTYPES -- 1. Amoeboid Microglia -- 2. Ramified Microglia -- III. LOCALISATION OF MICROGLIAL CELLS IN THE DEVELOPING BRAIN -- 1. Developing Cerebrum -- 2. Developing Cerebellum -- IV. ULTRASTRUCTURAL FEATURES OF AMCS -- V. FUNCTIONS OF MICROGLIA IN THE DEVELOPING BRAIN -- 1. Phagocytosis -- 2. Immune Functions of Microglia -- 3. Iron Acquisition -- 4. Nitric Oxide Production -- 5. Growth Factors -- 6. Microglia in Myelination -- 7. Microglia in Neurogenesis and Astrogenesis -- 8. Microglia and Synapses -- 9. Microglia and Vascularisation -- XIII. MICROGLIA IN DISORDERS OF THE DEVELOPING BRAIN -- 1. Infections -- 2. Periventricular White Matter Damage -- 3. Epilepsy -- 4. Autism -- CONCLUSION -- REFERENCES -- Chapter 2: THE MYSTIC EMBRYONIC MICROGLIA: ITS ORIGIN, FUNCTION AND SEEDING -- ABSTRACT -- INTRODUCTION -- NEUROECTODERMAL ORIGIN OF MICROGLIA -- MONOCYTIC ORIGIN OF MICROGLIA -- MESODERMAL ORIGIN OF MICROGLIA -- TROUBLESHOOTING -- MIGRATION CHARACTERISTICS OF MICROGLIA -- If Microglia Use the

Blood Vessels -- If Microglia Are Derived from Meningeal Sources --  
DEVELOPMENTAL ROLES OF MICROGLIA -- Angiogenesis -- Scavengers  
of Cell Debris -- Synaptics Pruning -- CONCLUSION --  
ACKNOWLEDGMENTS -- REFERENCES -- Chapter 3: SOLDIERS OF THE  
NERVOUS SYSTEM: MICROGLIA IN SURVEILLANCE, OFFENSE AND  
DEFENSE -- ABSTRACT -- SOLDIERS OF THE NERVOUS SYSTEM:  
MICROGLIA IN SURVEILLANCE, OFFENSE AND DEFENSE -- MARKERS OF  
MICROGLIA -- MICROGLIA AS SURVEILLANCE CELLS -- MICROGLIA AND  
DEVELOPMENT -- MICROGLIA AND DISEASE -- Neuron-Glia  
Interactions.  
Microglia and Pathogens -- Microglia and Neuropathogenesis --  
MICROGLIA AND REGENERATION -- THERAPEUTIC APPROACHES AND  
CHALLENGES -- CONCLUSIONS -- REFERENCES -- Chapter 4:  
MICROGLIA SECRETOME: FROM NEUROTOXINS TO NEUROTROPHINS --  
ABSTRACT -- 1. INTRODUCTION -- 2. MICROGLIA SECRETOME -- 3.  
IDENTIFICATION OF SECRETOME COMPONENTS -- 4. NEUROTROPHIC  
FACTORS -- 4.1. Neuroprotective Cytokines -- 4.2. Growth Factors --  
4.3. Neuroprotective Enzymes -- 4.4. Other Potential Neuroprotective  
Substances -- 5. NEUROTOXIC FACTORS -- 5.1. Reactive Molecules --  
5.2. Neurotoxic Enzymes -- 5.3. Other Potential Neurotoxic Substances  
-- 6. FACTORS WITH MULTIPLE EFFECTS -- 6.1. Cytokines -- 6.2.  
Cathepsins and Cystatins -- 6.3. Other Substances with Multiple Effects  
-- CONCLUSION -- ACKNOWLEDGMENTS -- REFERENCES -- Chapter 5:  
THE ROLE OF MICROGLIA IN NEURODEGENERATIVE DISEASE --  
ABSTRACT -- 1. INTRODUCTION -- 2. NORMAL IMMUNE FUNCTIONS OF  
MICROGLIA -- 2.1. Microglia as Mediators of CNS Inflammation -- 2.2.  
The In Vivo Visualization of Activated Microglia -- 3. MICROGLIA IN  
NEURODEGENERATIVE DISEASE -- 3.1. Alzheimer's Disease and other  
Dementias -- 3.2. Parkinson's Disease and Related Disorders -- 3.3.  
Huntington's Disease -- 3.4. Multiple Sclerosis -- 3.5. Amyotrophic  
Lateral Sclerosis -- CONCLUSIONS -- REFERENCES -- Chapter 6:  
MICROGLIA FUNCTION IN ALZHEIMER'S DISEASE -- ABSTRACT --  
INTRODUCTION -- MICROGLIA FUNCTION IN AD -- Microglia --  
Microglia in AD -- Microglia as Target for AD Therapy -- CONCLUSION  
-- REFERENCES -- Chapter 7: BLOOD DERIVED MICROGLIA-LIKE CELLS  
IN ALZHEIMER'S DISEASE -- ABSTRACT -- 1. NEUROPATHOLOGY OF AD  
AND ACTIVATION OF MICROGLIA -- 1.1. Basic Neuropathological  
Features of AD -- 1.2. Dual and Opposing Effects of Microglia on Brain  
Pathology of AD -- 2. BLOOD-DERIVED MONOCYtic CELLS IN THE AD  
BRAIN: OPENING OF NOVEL THERAPEUTIC AVENUES?.  
3. MECHANISMS OF THE ENGRAFTMENT OF BLOOD-DERIVED  
MONOCYtic CELLS INTO THE AD BRAIN -- 3.1. Engraftment of  
Monocytic Cells without Preconditioning -- 3.2. Studies on Animal  
Models with Preconditioning -- 3.3. Phenotype of the Monocytic Cells  
that Enter the Brain and the Role of Chemokines and Adhesion Proteins  
-- 3.4. Macrophage Colony-Stimulating Factor and Engraftment of  
Monocytic Cells to the Brain -- 3.5. Potential Role of Prostaglandins in  
Engraftment of Monocytic Cells to the Brain -- 3.6. Involvement of Toll  
Like Receptors and Myd88 in Engraftment of Monocytic Cells to the  
Brain -- 4. MECHANISM OF CLEARANCE BY BONE-MARROW  
DERIVED MONOCYtic CELLS -- 4.1. Involvement of Phagocytosis and  
Lysosomal Pathway -- 4.2 A Special Role of -1,4-Mannosyl-  
Glycoprotein 4--NAcetylglucosaminyltransferase -- 4.3. Other  
Molecules of Inflammatory Signaling in Ab Clearance by  
BM Derived Monocytic Cells -- CONCLUSION -- ACKNOWLEDGMENTS --  
REFERENCES -- Chapter 8: MICROGLIAL FUNCTIONS AGAINST  
AMYLOID- ACCUMULATION IN BRAINS OF ALZHEIMER'S DISEASE --  
ABSTRACT -- INTRODUCTION -- A AND HYPOTHESIS IN AD

PATHOGENESIS -- MICROGLIAL A PHAGOCYTOSIS IN AD BRAIN --  
REGULATION OF MICROGLIAL A PHAGOCYTOSIS -- CELL THERAPEUTIC  
APPROACHES IN AD -- CONCLUSION -- ACKNOWLEDGMENTS --  
REFERENCES -- Chapter 9: MODULATION OF MICROGLIAL REACTION IN  
BRAIN INJURY BY NOVEL THERAPEUTIC TOOLS BASED ONGENE THERAPY  
APPROACHES -- ABSTRACT -- 1. INTRODUCTION -- 2. ROLE OF  
NEUROINFLAMMATION IN HIV-1 ASSOCIATED COGNITIVE DISORDER --  
3. EXPERIMENTAL MODELS -- 4. HIV-1 GP120 ELICITS INCREASES IN  
DIFFERENT POPULATIONS OF MICROGLIAL CELLS -- 5. THE INCREASE OF  
CD68-POSITIVE CELLS WAS DOSE- AND TIME-DEPENDENT -- 6.  
ASTROCYTE PROLIFERATION IN RESPONSE TO GP120 ADMINISTRATION  
-- 7. NEUROINFLAMMATION CORRELATES WITH NEURON LOSS AFTER  
GP120 INJECTION.  
8. RSV40-DELIVERED ANTIOXIDANT ENZYMES REDUCE INFLAMMATION  
CAUSED BY GP120 -- 9. ACTIVATION OF MICROGLIAL CELLS AND  
ASTROCYTES PROLIFERATION AFTER INJECTION OF SV(GP120) INTO THE  
CP AND PROTECTION BY RSV40-DELIVERED ANTIOXIDANT ENZYMES --  
DISCUSSION -- REFERENCES -- Chapter 10: THE APPLICATION OF  
INHIBITORS OF MICROGLIAL ACTIVATION IN BRAIN DISEASES --  
ABSTRACT -- INTRODUCTION -- 1. GLUCOCORTICOIDS -- 2.  
MINOCYCLINE -- 2.1. Parkinson's Disease -- 2.2. Amyotrophic Lateral  
Sclerosis (ALS) -- 2.3. Alzheimer's Disease (AD) -- 3.  
ENDOCANNABINOIDS -- 3.1. Alzheimer's Disease (AD) -- 3.2. Multiple  
Sclerosis -- 3.3. Parkinson's Disease -- 4. ACTIVIN -- 5. CHEMOKINES  
-- REFERENCES -- Chapter 11: MICROGLIAL ACTIVATION IS REDUCED  
BY PROSTAGLANDIN E2 -- ABSTRACT -- INTRODUCTION --  
PROSTAGLANDIN E2 IS A REDUCTION FACTOR OF MICROGLIAL  
ACTIVATION -- PROSTAGLANDIN E2 REDUCES MICROGLIAL  
ACTIVATION THROUGH EP2 -- OTHER PROSTAGLANDIN E2 RECEPTORS  
MAY BE INVOLVED IN MICROGLIAL ACTIVATION -- MICROGLIAL  
ACTIVATION IS AUTO-REGULATED BY PROSTAGLANDIN E2 --  
PROSTAGLANDIN D2 MIGHT AFFECT MICROGLIAL ACTIVATION --  
PROSTAGLANDIN E2 PRODUCTION IS UP-REGULATED IN CENTRAL  
NERVOUS SYSTEM DISEASES -- EFFECT OF PROSTAGLANDIN E2 ON  
MICROGLIAL ACTIVATION HAS A NEUROPROTECTIVE ASPECT AGAINST  
CENTRAL NERVOUS SYSTEM DISEASES -- CONCLUSION -- REFERENCES  
-- Chapter 12: SYNAPTIC STRIPPING AND BEYOND: MICROGLIA OR  
ASTROCYTES? -- ABSTRACT -- INTRODUCTION -- MICROGLIAL  
ACTIVATION AND SYNAPTIC STRIPPING AFTER NERVE INJURY OF MOTOR  
NEURON -- REDUCED SYNAPTIC ACTIVITIES PRECEDES SYNAPTIC  
STRIPPING -- POSSIBLE SOURCES OF EXTRACELLULAR NUCLEOTIDES  
AFTER NERVE INJURY -- DIFFERENTIAL REACTIONS OF PERINEURONAL  
ASTROCYTES AND MICROGLIA AFTER HYPOGLOSSAL NERVE AXOTOMY  
-- ASTROCYTE AND MICROGLIA PLAY DISTINCT ROLES IN SYNAPTIC  
STRIPPING AND CELL FATE DECISION -- CONCLUDING REMARKS --  
ACKNOWLEDGEMENTS.  
REFERENCES -- Chapter 13: MICROGLIA-TO-NEURON COMMUNICATION  
INSPIRAL NOCICEPTIVE PATHWAYS -- ABSTRACT -- 1. INTRODUCTION  
-- 2. NEURON-TO-MICROGLIA AND MICROGLIA-TO-NEURON  
COMMUNICATION IN NEUROPATHIC PAIN: THE NERVE INJURY MODEL --  
2.1. From Injured Primary Afferent Fibres to Spinal Microglia -- 2.2.  
Molecular Changes in Activated Spinal Microglia -- 2.3. From Spinal  
Microglia to DH Neurons -- 3. OTHER MODELS OF MICROGLIA-TO-  
NEURON COMMUNICATION IN NOCICEPTION -- 3.1. Diabetes-Induced  
Neuropathic Pain -- 3.2. Morphine and Microglia -- 4. CLINICAL  
APPLICATIONS -- CONCLUSION -- REFERENCES -- Chapter 14:  
MICROGLIA IN HUNTINGTON DISEASE -- INTRODUCTION --  
HUNTINGTON DISEASE HISTORY -- HD CLINICAL FEATURES -- HD

NEUROPATHOLOGY -- HD GENETICS -- HUNTINGTIN FUNCTION --  
PUTATIVE MECHANISMS OF MUTANT HTT TOXICITY -- INTRODUCTION  
TO MICROGLIA -- INFLAMMATION IN HD -- COMPLEMENT SYSTEM AND  
HD -- NEUROINFLAMMATION IN HD -- PERIPHERAL VS. CENTRAL  
INFLAMMATION IN HD -- CASPASE INVOLVEMNT IN MICROGLIA  
ACTIVATION -- CASPASES AND HD -- THE KYNURENINE PATHWAY --  
ALTERATIONS IN THE KYNURENINE PATHWAY IN HD -- TARGETING THE  
KYNURENINE PATHWAY IN HD -- MICROGLIA SIGNALING PATHWAYS IN  
HD -- IRON REGULATION IN THE BRAIN -- IRON IN HUNTINGTON  
DISEASE -- THE CANNABINOID SYSTEM -- CANNABINOIDS IN HD --  
PERSPECTIVES AND CONCLUSION -- REFERENCES -- Chapter 15: THE  
NEUROINFLAMMATORY ROLE OF SCHWANN CELLS IN HEALTH AND  
DISEASE -- ABSTRACT -- ABBREVIATIONS -- 1. INTRODUCTION -- 2.  
SCHWANN CELLS ARE IMMUNE COMPETENT CELLS -- 2.1. Schwann Cells  
as Sensors of Danger within the PNS -- 2.2. Schwann Cells as Immune  
Effector Cells within the PNS -- 2.3. Schwann Cells as Antigen  
Presenting Cells? -- 3. THE NEUROINFLAMMATORY ROLE OF SCHWANN  
CELLS IN DISEASE -- 3.1. A Dysregulated Immune Response is the  
Driving Force of Inflammatory Neuropathies.  
3.2. A Secondary Immune Response in Hereditary Neuropathies  
Contributesto Disease Manifestation.
