Sommario/riassunto	Dyslexia is a complex condition, and every dyslexic needs a different solution. Technology is not that solution, but a part of the process to minimise the impact of dyslexia on individuals and to assist with the difficulties they face in everyday situations, so that they can demonstrate their potential in school or at work. This book takes the reader back to basics, from understanding the needs of the dyslexic individual to getting the most from available technology. It does this by providing frameworks from theoretical perspectives and following this through to practical implementation, inclu
