

1. Record Nr.	UNINA9910826635003321
Titolo	Difficult airway management / / edited by Mansukh Popat
Pubbl/distr/stampa	Oxford ; ; New York, : Oxford University Press, 2009
ISBN	0-19-176882-0 1-283-57997-9 9786613892423 0-19-157568-2
Edizione	[1st ed.]
Descrizione fisica	1 online resource (182 p.)
Collana	Oxford Anaesthesia Library
Altri autori (Persone)	PopatMansukh T
Disciplina	616.2/3
Soggetti	Trachea - Intubation Anesthesia Lungs - Diseases, Obstructive
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Contents; Preface; Contributors; Abbreviations; 1 Difficult airway: definitions, incidence and consequences; 2 Difficult airway management: general principles; 3 Basic anatomical, physiological and pharmacological principles of difficult airway management; 4 Preoperative airway assessment; 5 Management of the anticipated difficult airway: without clinical upper airway obstruction; 6 Management of the anticipated difficult airway: the patient with critical upper airway obstruction; 7 Awake fiberoptic intubation 8 Management of the unanticipated difficult airway: the 'can't intubate, can ventilate' scenario 9 Unanticipated difficult intubation: 'can't intubate, can't ventilate' (CICV) scenario; 10 Difficult airway in special situations; 11 Management of paediatric difficult airway; 12 Extubation and re-intubation strategy; 13 New airway devices for difficult airway management; 14 Airway training; Index; A; B; C; D; E; F; G; H; I; J; K; L; M; N; O; P; Q; R; S; T; U; V; W; X
Sommario/riassunto	Management of a patient with a difficult airway has undergone significant changes in recent years, with the introduction of both new guidelines and equipment. Chapters cover basic topics such as recognition of a difficult airway and general principles of management

and then move onto more complicated topics such as the 'anticipated' and 'unanticipated' difficult airway scenarios. New equipment is outlined and reviewed, and a chapter focuses on extubation and its importance. Thebook also includes a chapter on management in common clinical settings and a separate chapter covers paediatric airway
