Sommario/riassunto	What is the root cause of ethical failure? Why is preoccupation with ethics more a part of the problem than a part of the solution? What makes ethical conduct a natural expression of who we are? What enables us to be ourselves in our relations with others? Ethical failure has become a significant concern in public life, in organizations and in educational institutions. The Capacity for Ethical Conduct explores how qualities of character and personality either make ethical conduct possible for the individual or foster ethical failure. Da
