Nota di contenuto	Elinor Ostrom's radical life -- The commons : from tragedy to triumph -- Climate change, ecology and green politics -- Beyond markets and states -- Deep democracy -- Feminism and intersectionality -- Trust and cooperation -- Science for the people -- Transforming institutions -- Conflict and constestation.
Sommario/riassunto	Elinor Ostrom was both a groundbreaking thinker and one of the foremost economists of our age. The first and only woman to win the Nobel Prize for Economics, her revolutionary theorizing of the commons opened the way for non-capitalist economic alternatives on a massive scale. And yet, astonishingly, most modern radicals know little

about her. This book fixes that injustice, revealing the indispensability of her work on green politics, alternative economics, and radical democracy.--Publisher's description.
