8.1 Descartes' new approach to numbers and equations8.2 Wallis and the primacy of algebra; 8.3 Barrow and the opposition to the primacy of algebra; 8.4 Newton's Universal Arithmetick; Appendix 8.1 The quadratic equation. Descartes' geometric solution; Appendix 8.2 Between geometry and algebra in the seventeenth century: The case of Euclid's Elements; 9 New Definitions of Complex Numbers in the Early Nineteenth Century; 9.1 Numbers and ratios: giving up metaphysics; 9.2 Euler, Gauss and the ubiquity of complex numbers; 9.3 Geometric interpretations of the complex numbers
9.4 Hamilton's formal definition of complex numbers

Sommario/riassunto

The world around us is saturated with numbers. They are a fundamental pillar of our modern society, and accepted and used with hardly a second thought. But how did this state of affairs come to be? In this book, Leo Corry tells the story behind the idea of number from the early days of the Pythagoreans, up until the turn of the twentieth century. He presents an overview of how numbers were handled and conceived in classical Greek mathematics, in the mathematics of Islam, in European mathematics of the middle ages and the Renaissance, during the scientific revolution, all the way through to the

Sommario/riassunto

Die deutlichen Abweichungen der Luftfahrtindustrie vom typischen Entwicklungsmuster im produzierenden Sektor nimmt Daniel Guffarth für seine innovationsökonomische Arbeit zum Anlass, die Ursachen für diese Anomalien theoretisch und empirisch zu analysieren. Der Autor identifiziert die dynamische Wirkungsebene in dieser Industrie in den Netzwerkarchitekturen des Innovationsprozesses. Es zeigt sich ein technologisches wie industriestrukturelles Spannungsfeld, in dem sich permanente Ambidextrieanforderungen peristaltisch in den Wertschöpfungsebenen nach unten erweitern. Dies stellt Zulieferer vor enorme technologische und ressourcenseitige Herausforderungen, die die Zukunftsfähigkeit der europäischen Luftfahrtindustrie maßgeblich beeinflussen. Der Inhalt • Industriedynamische Theorieentwicklung • Qualitativer Strukturwandel von Industrien mit komplexen Produkten • Netzwerkdynamik • Wissensentwicklung im F&E-Netzwerk • Evolution der Luftfahrtindustrie Die Zielgruppen • Dozenten und Studenten der Wirtschaftswissenschaften mit den Schwerpunkten Innovationsökonomik, Netzwerkforschung sowie Luft- und Raumfahrtforschung • Fach- und Führungskräfte in den Bereichen Strategie- und Unternehmensentwicklung sowie des Technologie- und Innovationsmanagements und der Innovationspolitik Der Autor Dr. Daniel Guffarth sammelte vor seiner heutigen Tätigkeit als Unternehmensberater und Dozent an Hochschulen Industrieerfahrung in der Automobil- sowie Luft- und Raumfahrtindustrie im In- und Ausland.
