Target 4. Gender-sensitive environmental justice -- 4.4.1. Highlight women's green behaviour -- 4.5. Target 5. Statistical data and monitoring progress on integrating the gender-environment nexus -- References.

Sommario/riassunto

Gender equality and environmental sustainability are gaining political momentum as global challenges that require urgent action at the national and international levels. Both figure prominently, albeit with limited interlinkages, in the United Nations Agenda 2030, and gender equality considerations are slowly making their way into international environmental and climate commitments.
