One Dream, Many Voices: The Mexican American Women's National Association -- 7. Conclusion -- Notes -- References -- Index
Sommario/riassunto	The formation of a group identity has always been a major preoccupation of Mexican American political organizations, whether they seek to assimilate into the dominant Anglo society or to remain separate from it. Yet organizations that sought to represent a broad cross section of the Mexican American population, such as LULAC and the American G.I. Forum, have dwindled in membership and influence, while newer, more targeted political organizations are prospering— clearly suggesting that successful political organizing requires more than shared ethnicity and the experience of discrimination. This book

sheds new light on the process of political identity formation through a study of the identity politics practiced by four major Mexican American political organizations—the Southwest Network for Environmental and Economic Justice, the Southwest Industrial Areas Foundation, the Texas Association of Mexican American Chambers of Commerce, and the Mexican American Women's National Association (now known as MANA—A National Latina Organization). Through interviews with activists in each organization and research into their records, Benjamin Marquez clarifies the racial, class-based, and cultural factors that have caused these organizations to create widely differing political identities. He likewise demonstrates why their specific goals resonate only with particular segments of the Mexican American community.

Sommario/riassunto

In *The Policy of Darius and Xerxes towards Thrace and Macedonia* Miroslav Vasilev analyses in detail the policy of the Persian kings towards their European possessions in the years 514–465 BC. The book examines the status of Macedonian rulers under the Persian kings, as well as the status of the Thracian territories conquered as a result of the campaigns of Darius and Megabazus. In addition, the author localizes many tribes, rivers, lakes, mountains, and other geographical features of primary importance in defining the territorial span of the European lands conquered by the Persians. Vasilev examines literary sources, epigraphic evidence, coins, and archaeological finds relevant to the topic.
